Gentlemen,

As someone who will be effected by the Atlantic Coast Pipeline from a state where there have been multiple hearings I implore you to hold public hearings and truly evaluate the human health and biological costs of the line. the whole project has been called into question by a number of entities, invluded Virginia Senator Kain who pointed out that FERC had only three members where the law requires five, when it made its 2-1 ruling in favor of the line. FERC has also gone against its own ruling to wait until all permits are issued before any permits are issued. THERE IS NO RUSH. LET'S MAKE GOOD DECISIONS.

Thank you.

Sincerely,  
Carrie Kline
